

# Ragic!

**#1 NO CODE TOOL FOR  
DIGITALIZING YOUR BUSINESS PROCESSES**

# Existing Pain Points

Still using Excel?

Develop from scratch?

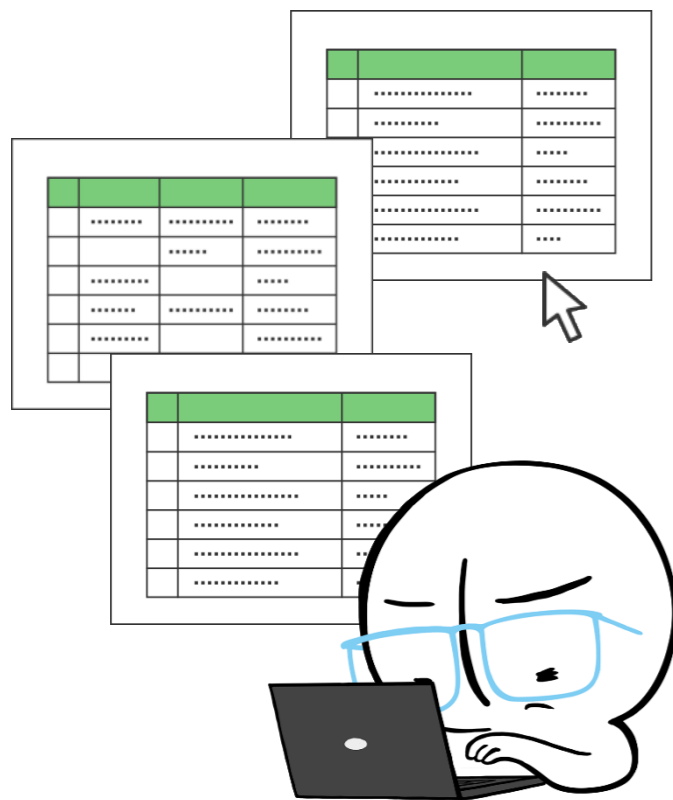

Software package?

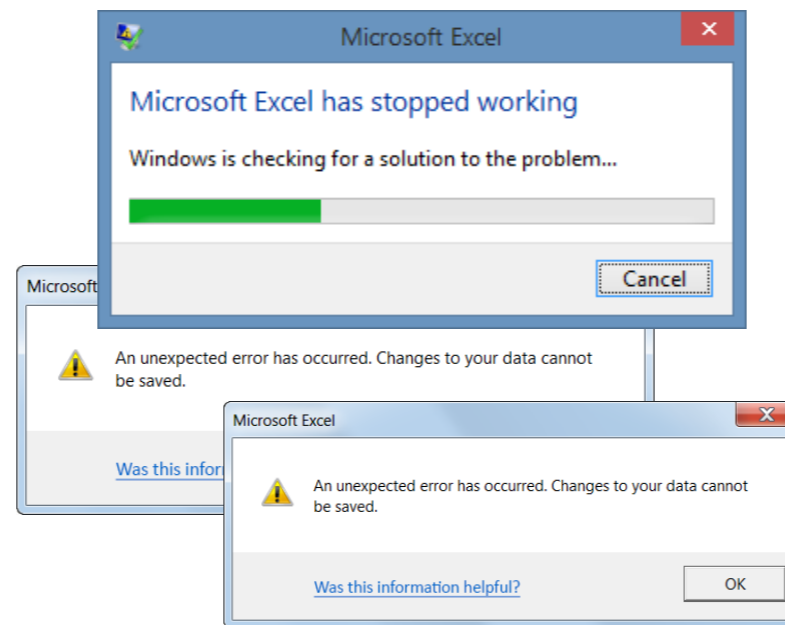

# Still using Excel?

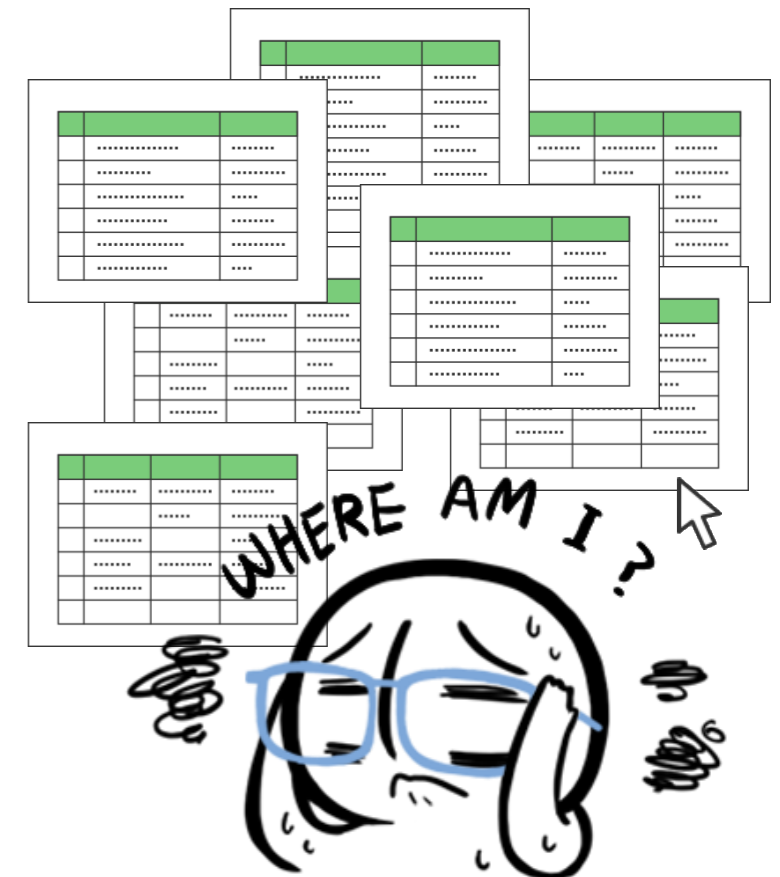

## Merging versions

## Locating errors

## Finding the right info

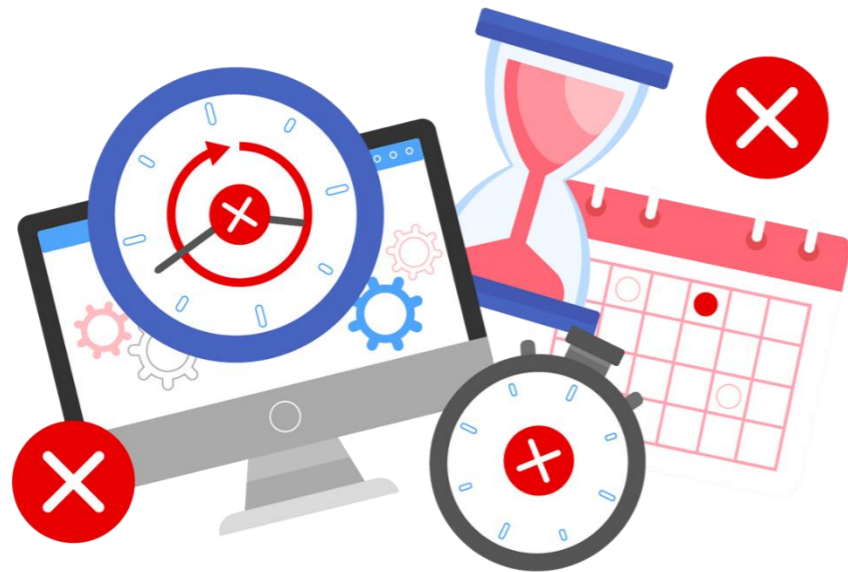

**Ragic!**

# Develop from scratch?

## Delayed or failed projects

Wasted tons of time describing your business to your contractor, but you only ended up with **a system that barely fits.**

## Maintenance struggles

Is your contractor still answering your phone after 3 years? How about 10 years?

**Ragic!**

# Software package?

## Way too big

A software package has a lot of functions, but it doesn't really meet your actual requirements.

## Large hidden costs

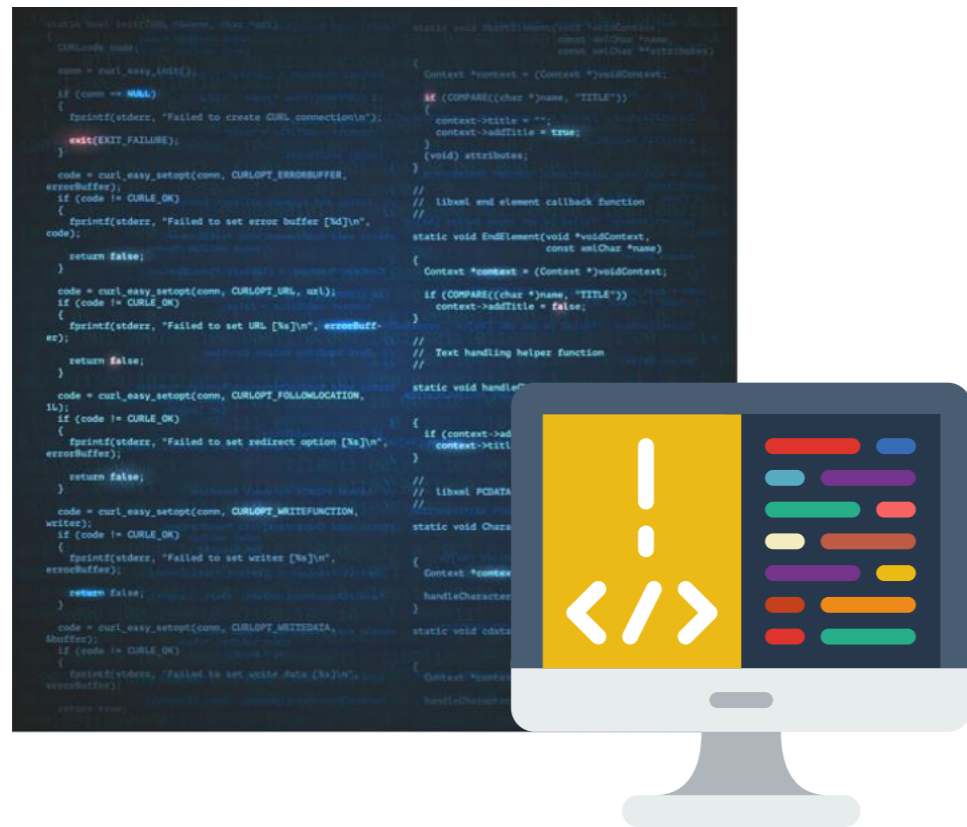

Additional customizations are needed to meet business requirements, which will cost much more than expected.

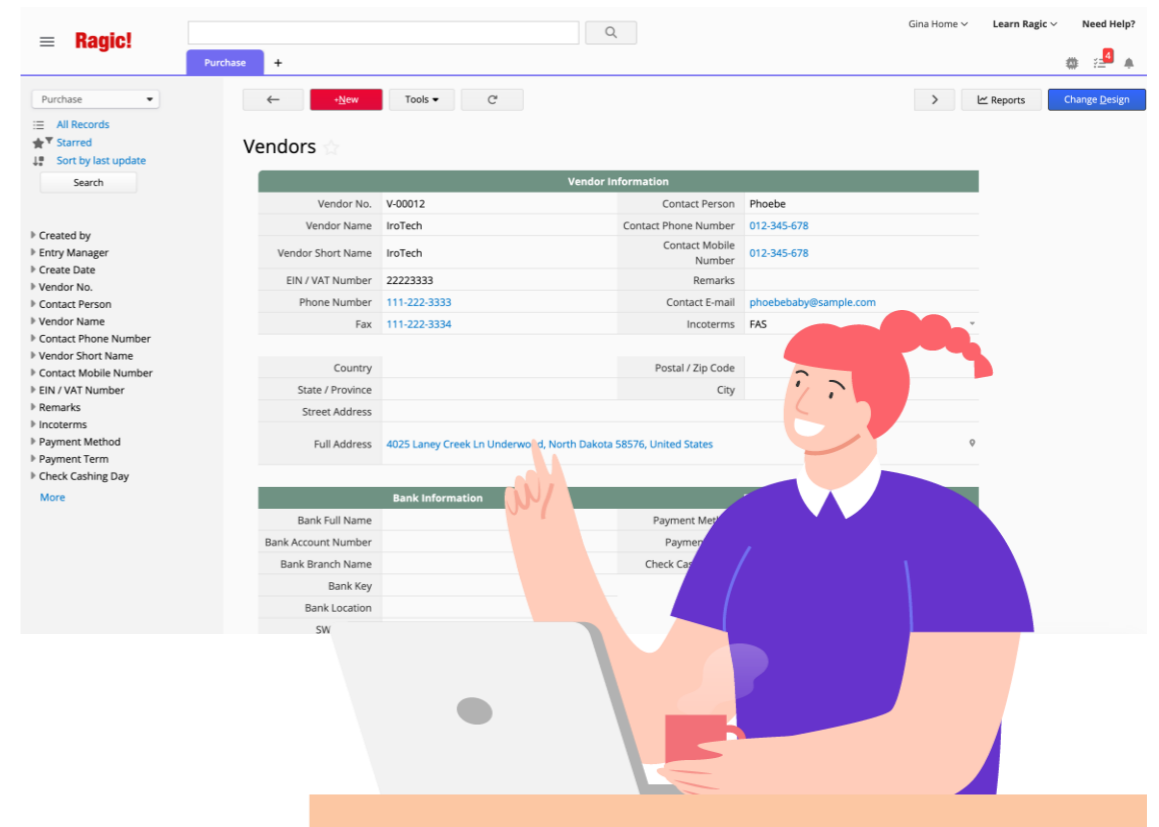

**Ragic!**

# Ragic! is here to solve this

Traditional Database Development:

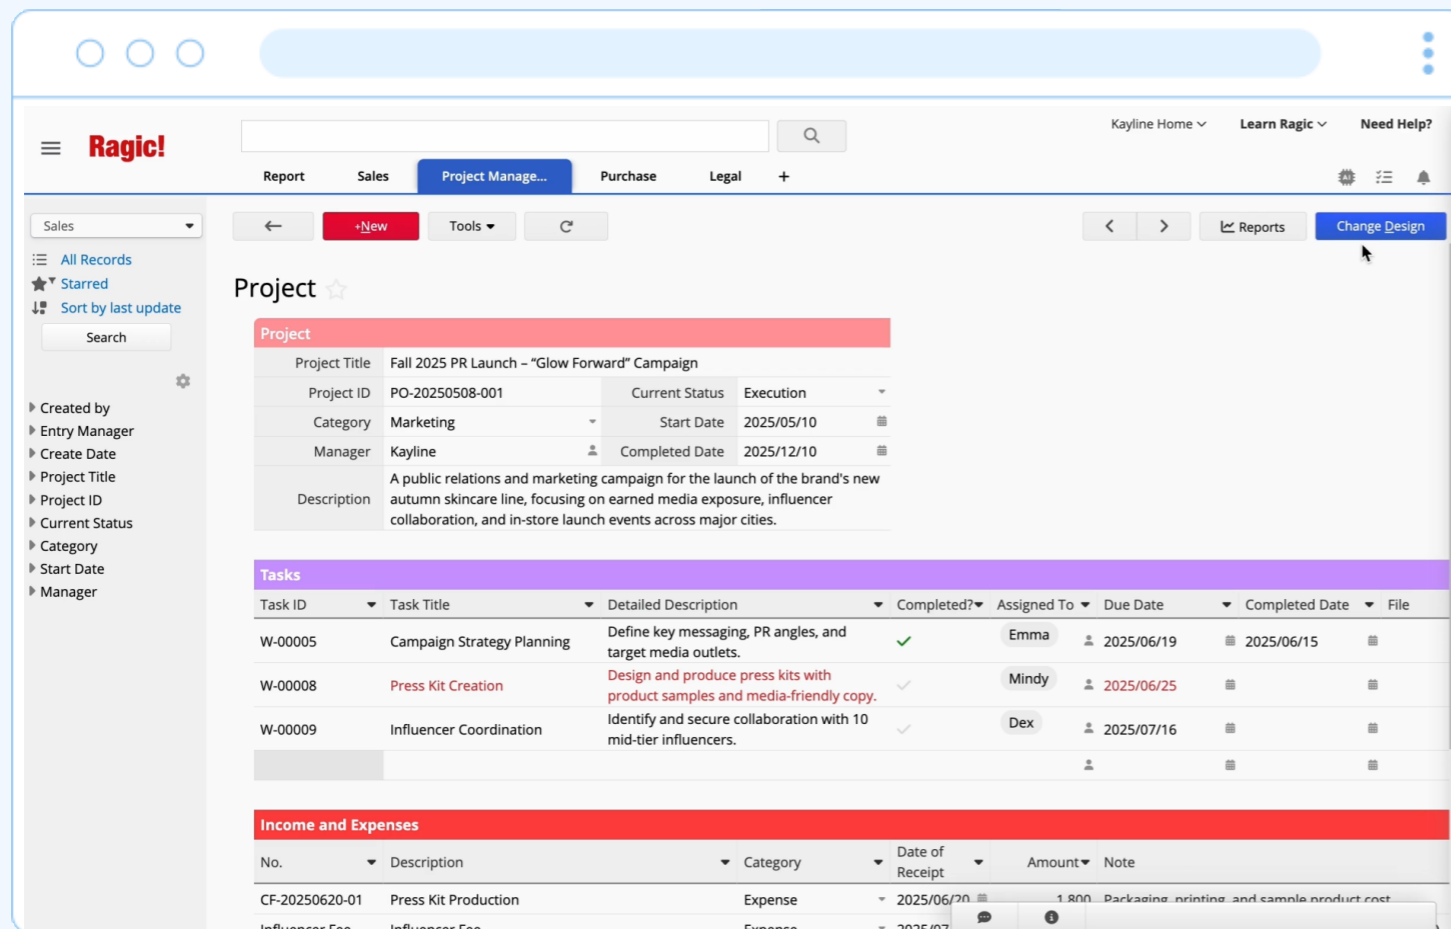

Ragic! No-code Database:

What makes **Ragic!** different?

# Customization

Instant design adjustments, without a line of code

- ✓ Relationship between sheets
- ✓ Instant design adjustments
- ✓ Add and modify features

# Integration

A single database system that manages all your workflows

# **Ragic!** Powerful features

Your **no-code** database comes with these powerful features!

# Full-Text Search

The confidence of instantly finding the data you are looking for

The screenshot shows a web application interface for a sales system. At the top, there is a search bar with the text 'Twila' entered. Below the search bar, a dropdown menu displays search results for 'twila', including several sales orders with details like order numbers, dates, and customer information. The main content area is a table of sales orders with columns for Order Number, Order Date, Grand Total, Status, Customer, Customer ID, and Sales. The table is filtered to show only orders related to the search term 'Twila'. The interface also includes a sidebar with navigation options like 'All Records', 'Starred', and 'Sort by last update', and a top navigation bar with links for 'Kayline Home', 'Learn Ragic', and 'Need Help?'.

Order Number	Order Date	Grand Total	Status	Customer	Customer ID	Sales

# Query Builder and Data Views

Create multiple views based on query criteria using any combination of fields

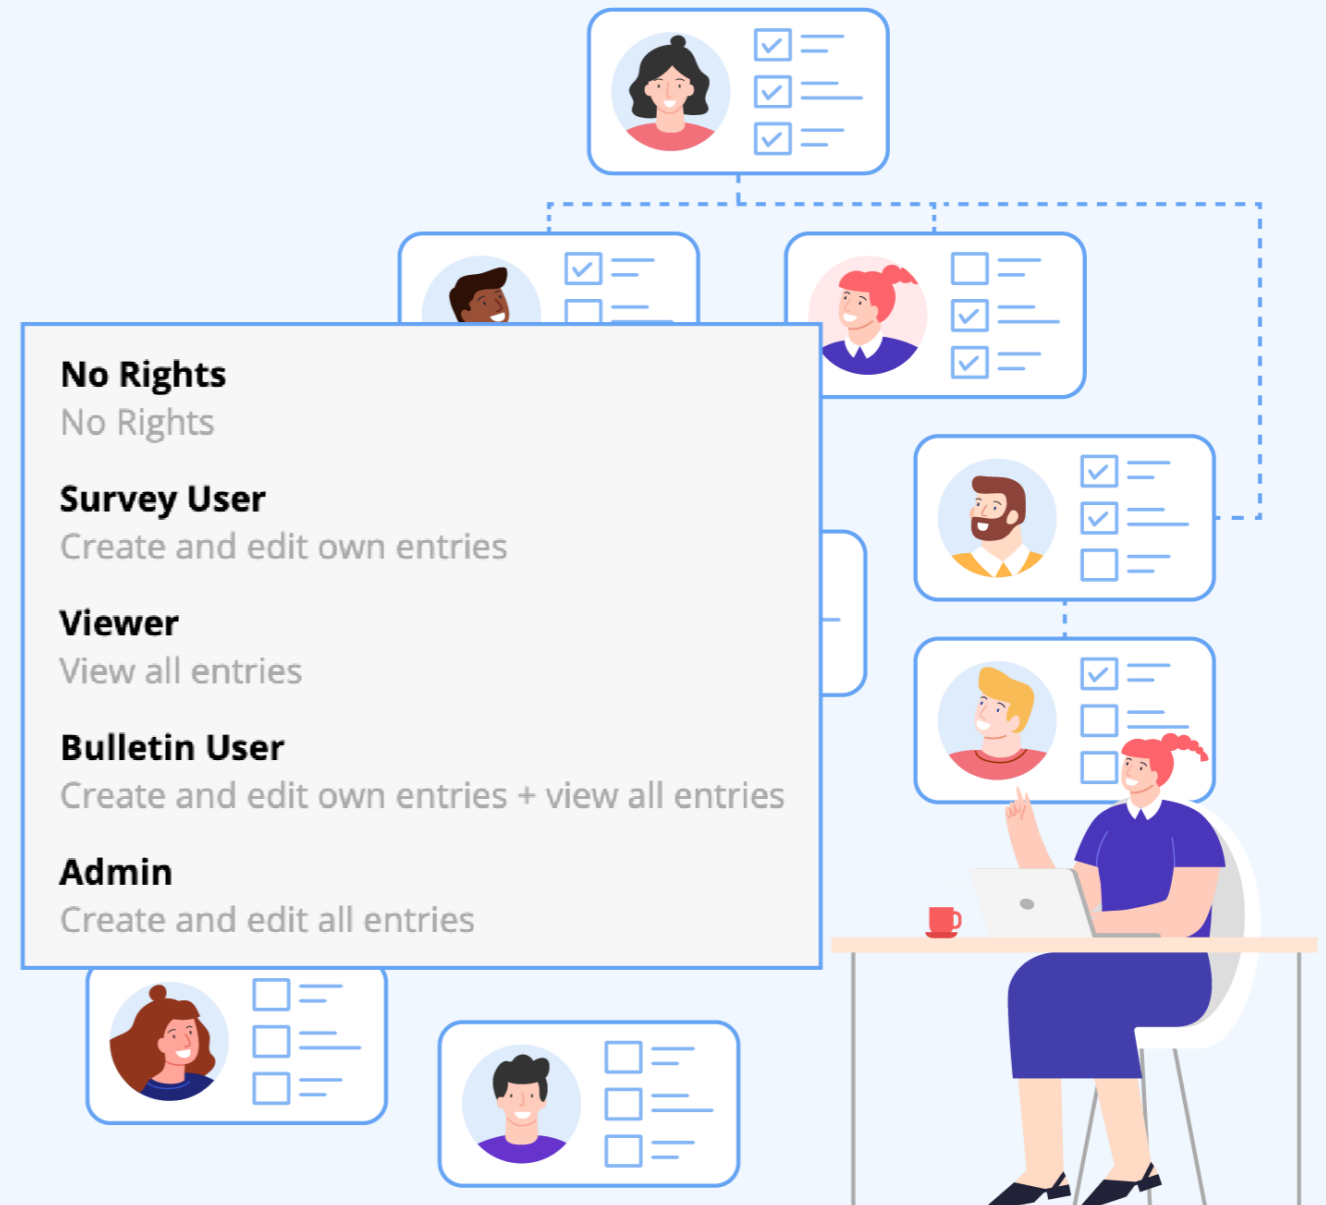

The screenshot displays a web application interface for a 'Query Builder' and 'Data Views'. On the left, a sidebar contains a search bar, a 'Save as View' link, and a list of filters. A dropdown menu is open under the 'Approval' filter, showing options like 'Tomorrow', 'Today', 'Yesterday', 'Next Week', 'This Week', 'Last Week', 'Next Month', 'This Month', 'Last Month', 'Next Quarter', 'This Quarter', and 'Last Quarter'. Below this, there are checkboxes for 'Order Date', 'Status', and 'Order Number', and a 'Filter by Text' section with checkboxes for 'Amy', 'Brian', 'Emma', and 'Fabio'. The main area shows a table titled 'Order' with columns: Order Number, Order Date, Status, Subtotal, Customer, and Customer ID. The table contains 15 rows of data, each with a unique order number, date, status, subtotal, customer name, and customer ID.

Order Number	Order Date	Status	Subtotal	Customer	Customer ID

# Approval Workflow

One-click approval process through Ragic's database, email, or Ragic App, with the ability to adapt your approval workflow by setting up rules

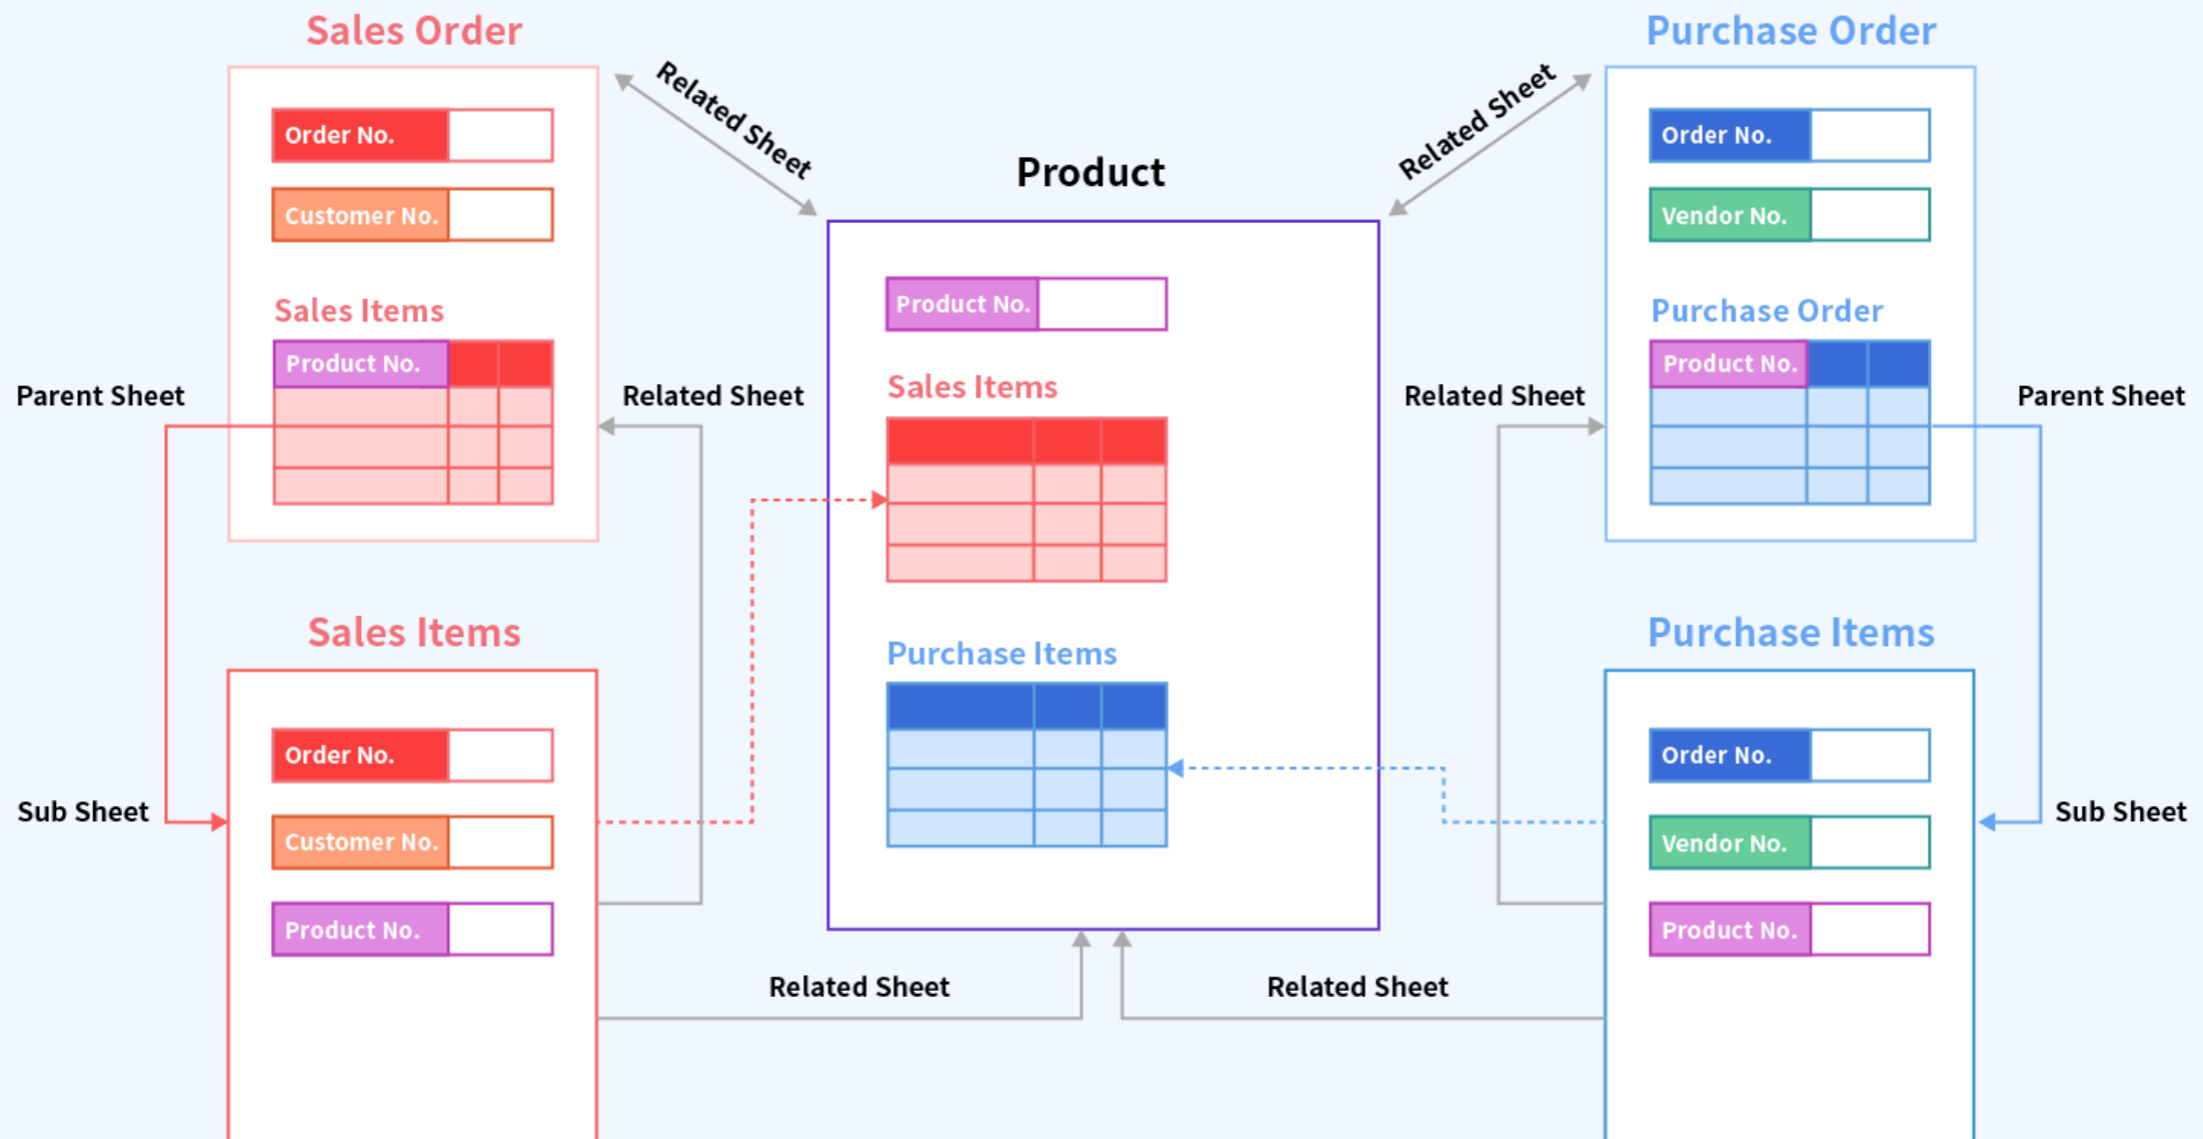

The screenshot displays the Ragic! web application interface for a Purchase Requisition. The top navigation bar includes the Ragic! logo, a search bar, and user information (Emma Home, User Manual Doc). The main content area is titled "Purchase Requisition" and is divided into several sections:

- Purchase Requisition Information:** A table with fields for PR # (PR-20250715-004), Date (2025/07/15), Created By (Emma), Department (Sales), Priority (Medium), and Expected Arrival Date (2025/08/06). Remarks include "New employee equipment for the Sales Department".
- Review Information:** A table with fields for Approval Status (Not Started), Reviewing Officer (Kayline), Review Date, and Review Note.
- Purchase Requisition Items:** A table with columns for #, \*Product No., Product Name, Specification, \*Qty, Usage Description, and Suggested Vendor. It lists two items: a MacBook Pro 13-inch and a Swivel office chair.

A red text prompt at the bottom right states: "Please fill in Reviewed Amount once approved." A blue callout box at the bottom center says "Start an approval workflow in Ragic". A smaller window titled "Approval" is visible at the bottom right, showing a table with columns for Step Name and Name, with a row for "Supervisor" and "Kayline", and a "Start approval" button.

# Cross-Sheets Relationships

Handle one-to-many relationships in Ragic  
with automated data retrieval and calculation

# Link and Load

Significantly **reduces data entry time** and **prevents manual input errors**

## Sheet Linking

### Link & load ?

Links to 5 sheets:  
**Accounts**, **Contacts**,  
**Opportunities**, **Pricelist**,  
**Products (CRM)**

### Multiple versions ?

No other versions of this sheet.

### New sheet from subtable ?

No linked sheets generated.

### Show references from existing sheets ?

No reference subtables.

### Link fields from parent sheets

2 parent sheets of this sheet:  
**Accounts**, **Accounts**

The screenshot shows the Ragic! application interface. At the top, there's a search bar and a notification: "29 days remaining, subscribe now!". Below the search bar, there are tabs for "Start", "Sales Order", and "HR". The main content area is titled "Orders" and contains a form with the following fields:

Order ID	00002
Order Date	2021/02/24
Customer ID	C-00002
Customer Name	Jackson Casper
Phone	(069) 824-0621
Email	jacksoncasper20@sample.com
Shipping Address	37234 SE Lusted Rd, Boring, OR 97009

Below the form, there's a table with columns: Product ID, Product Name, Category, and Unit Price. The "Customer ID" field in the form is highlighted with a red box and labeled "Linked Field". The "Email" field is also highlighted with a red box and labeled "Loaded Field".

# Multiple Version Sheets

The same sheet can be created in multiple versions to display different information

# Action Buttons: Update Values

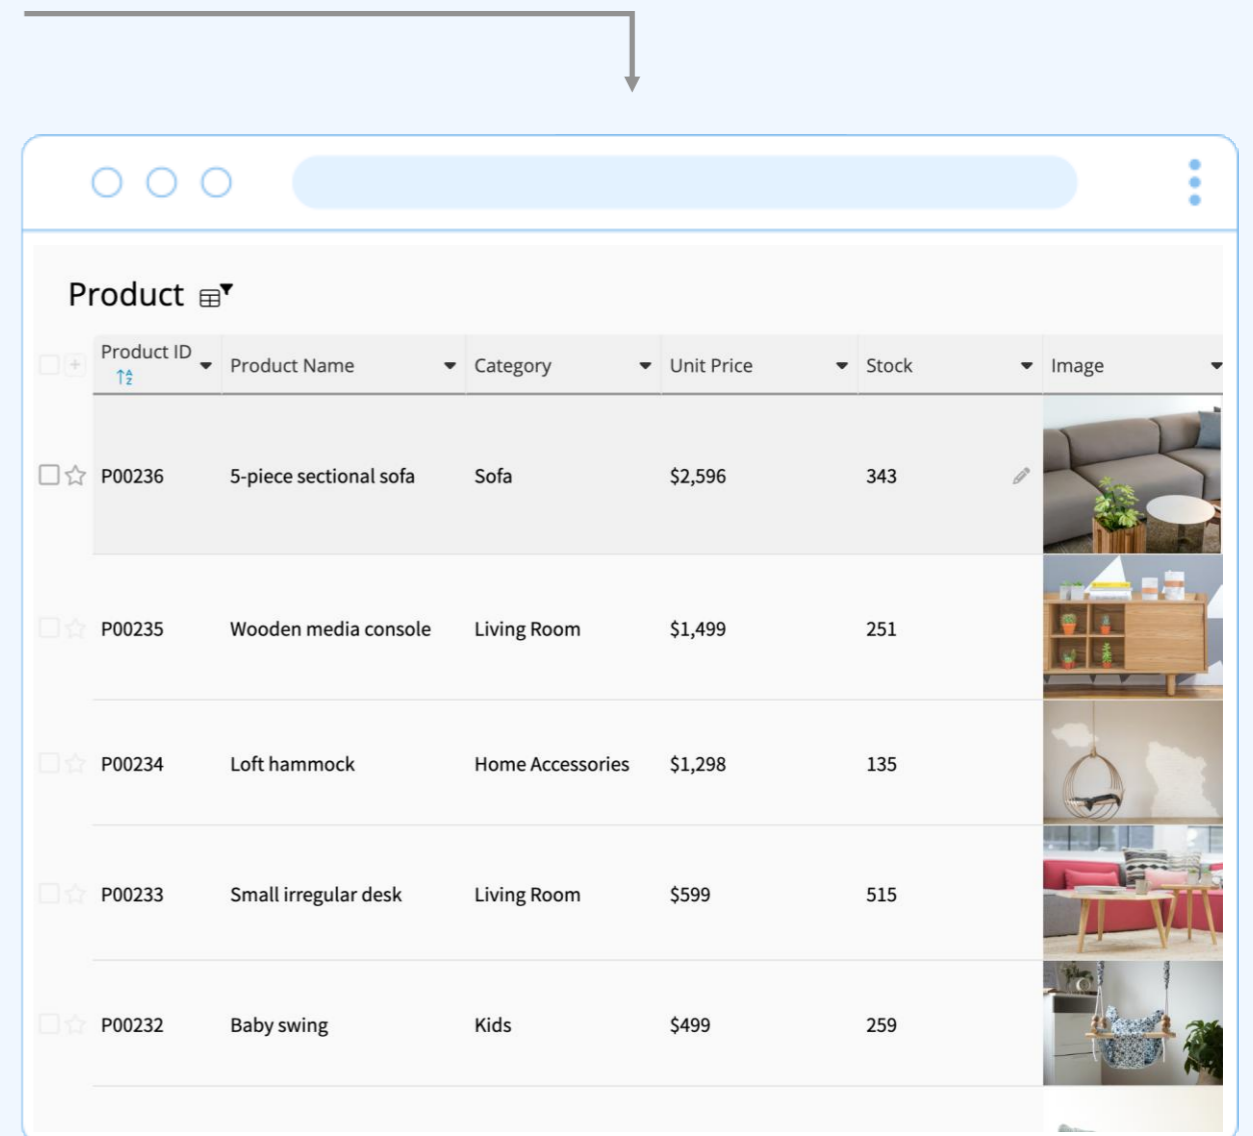

Update the inventory balance with one click

The screenshot shows a 'Sales Order' page. A modal dialog box is open in the center, displaying a green checkmark icon and the text 'Action Update Inventory execution complete.' with an 'OK' button. The background shows the 'Order Information' section with details like Order Number (PO-20220407-003) and Status (Confirmed). Below that is the 'Order Details' table with columns for Product ID, Product, Unit Price, Quantity, and Line Total. At the bottom, there is an 'Actions' bar with buttons for 'Delivery Notes', 'Update Inventory' (highlighted with a red box), and 'Reverse Deduct Inventory'.

Product ID	Product	Unit Price	Quantity	Line Total
P00234	Loft Hammock	\$1,298	1	\$1,298
P00236	5-Piece Sectional Sofa	\$2,596	1	\$2,596

Subtotal	\$3,894
Discount	
Grand Total	\$3,894

The screenshot shows a 'Product' list page. An arrow from the 'Update Inventory' button in the previous screenshot points to this page. The product list table has columns for Product ID, Product Name, Category, Unit Price, Stock, and Image. The 'Update Inventory' button is highlighted with a red box in the previous screenshot.

Product ID	Product Name	Category	Unit Price	Stock	Image
P00236	5-piece sectional sofa	Sofa	\$2,596	343	
P00235	Wooden media console	Living Room	\$1,499	251

# Embedding on Your Website

Integrate database functionalities to power your web pages and blogs

The image shows a browser window with a light blue header bar containing three window control buttons on the left and a menu icon on the right. The main content area has a marble background. A white form titled "Customer" is centered on the page. The form contains the following fields:

- Customer ID**: A text input field containing "C-00077".
- Customer Name**: An empty text input field.
- Email**: An empty text input field.
- Sales**: A dropdown menu with a downward arrow.
- Phone**: An empty text input field.
- Bedrooms**: A group of radio buttons with options "1+", "2+", "3+", "4+", and "5+".

# Calendar Sync

Track all the dates in the database with your favorite calendar application

The image illustrates a 'Calendar Sync' feature. On the left, a database table titled 'Sales Orders' is shown with columns: Sales Order #, Account ID, Account Name, Estimated Shipping Date, Status, and Date. A red box highlights the 'Estimated Shipping Date' column. On the right, a calendar application for June 2024 is shown, with purple bars representing the dates from the 'Estimated Shipping Date' column. The bars are placed on the calendar grid, showing the synchronization of data between the two systems.

### Form Pages and Listing Pages

**Listing Pages and Form Pages** are the unique advantages of Ragic compared to other spreadsheet software, and they are very important concepts in usage.

**Listing Pages:** Provides a summary overview of all data in the sheet.

**Form Pages:** Displays detailed information of a single data/record.

The **Listing Page** and the **Form Page** are two sides of one sheet. Adding data on either side will synchronize to the other side. When entering the sheet, you will first see the **Listing Page**. Clicking on a record will lead you to the **Form Page** for detailed information.

**Listing Page** **Form Page**

### What's the Difference Between the Lite and Professional Plans?

The main differences between the **Lite** and **Professional Plans** are as follows:

- The **Lite Plan** is limited to 5 **Custom Sheets** (including self-designed sheets and modified **Free Templates**), while the **Professional Plan** has no limit.
- The **Professional Plan** supports the on-premises option, whereas the Lite version does not.

The **Professional Plan** offers more comprehensive features and is the **most popular choice among businesses**. However, if you only need a few **Custom Sheets** or if **Free Templates** meet your requirements, the **Lite Plan** may be a suitable option.

How the Land of Misfits Kiko Ranch Achieved Digital Transformation in Just 2 Days with Ragic

Case Studies

By Nikki Lin posted on 2025/07/11

From slow, manual paper-based processes and disassociated Google Docs and spreadsheets, The Land of Misfits Kiko Ranch achieved digital transformation with Ragic in just 2 days' time. They gained a centralized, holistic view of the business, tracked expenses for ROI calculations, and automated customer invoices.

```

# Technology Stack

Easy to deploy, cross-platform Java solution

## Java-based

Deploy on Linux and Windows servers

## Embedded application server (Jetty), embedded DB (Berkeley DB)

- Easy to install and deploy
- No need to install a separate AP server or database.
- NoSQL DB for high performance on flexible data structure

## Javascript/HTML/CSS Interface

No need to install any plugins; all browsers can run it

# On-premises VS Cloud-hosted

You can host Ragic on your own server if necessary, provided that your organization has an experienced IT crew who understands how to maintain and keep a server safe and secure.

## Requirements:

- Professional IT personnel with experience in maintaining network servers
- 10 users minimum
- Paid annually
- Professional, Concurrent, and Enterprise Plans

**If you choose the on-premises option, you will be responsible for the following maintenance tasks:**

Update SSL, Configure backups, Set up the server firewall, Adjust system parameters and allocate resources to ensure performance (memory/Swap/disk I/O), Update the server operating system, Ensure OS-level security settings comply with standards

Other features			Line notify, custom database page, data dictionary, etc.	All Professional plan's features	All Professional plan's features + Uptime SLAs, dedicated managed VM, test environments

## Credit Card

- Adjust the number of users at any time
- Account Billing > Billing History > Access the invoices of your payments
- Pay **monthly** or **annually**  
**One month free with a one-year subscription!**

## Bank Transfer

- Purchase annually with full upfront payment
- No refunds will be issued for reductions in users, downgrades, or cancellations during the subscription period
- Receive a quote from us by emailing us your request ([payment instructions](#))

**Calculation : 2025/06/19~2026/06/19 PROF plan+ 5 users + One-year subscription**

### 1. Credit Card

\$19 USD × 5 users × 12 months

– 1 month free with a 1-year subscription

**= \$1,045 USD**

### 2. Bank Transfer

\$19 USD × 5 users × 12 months

**= \$1,140 USD**

 Application Architecture Security

 Physical Security

 People Processes

 Network and System Security

 Backups & Disaster Recovery

 Storage Security

 On-premise Servers

# Backups & Disaster Recovery

Multiple layers of backup to keep you from data loss

## System Wide Backups

- All Ragic servers are fully backed up on a daily basis to ensure service can be quickly recovered in case of any problem.

## Account Database Backups

- For professional plans and above, accounts have their own individual full daily, weekly, and bi-weekly database backups to a different location on a service by a different provider to ensure that you can restore your data in any situation.
- We also allow you to manually backup, take snapshots, or restore your account database with a backup yourself.

## Manual Backups

- Ragic also allow users to manually backup and download your data to manage your backups yourself (available to Professional, Concurrent, Enterprise plan).

# ISO 27001 & Compliance

## ISO 27001 Information Security

ISO/IEC 27001 is a global standard for managing information security, introduced by ISO and IEC in 2005 and updated in 2013 and 2022. It provides guidelines for creating and continually improving an Information Security Management System (ISMS) to enhance the security of organizational information assets.

Ragic has been certified with the ISO/IEC 27001:2022 standard. We implement information security protection and prevention measures following relevant governance methods.

## Data Privacy Framework

The EU-U.S. Data Privacy Framework and the Swiss-U.S. Data Privacy Framework ("Data Privacy Framework") provide a mechanism for companies in Europe and America to comply with data protection requirements.

Ragic has been certified to the Data Privacy Framework as set forth by the U.S. Department of Commerce regarding the collection, use, and retention of personal data transferred from the EEA, the United Kingdom, and Switzerland to the United States.

## **GDPR Compliance** ( General Data Protection Regulation )

Ragic complies with the General Data Protection Regulation (GDPR) with procedures for data erasure, personal info protection, and data transfers.

We routinely evaluate risks, bolster security, and detail our practices in our privacy policy.

We have European servers located in Belgium and Ireland. Users from other regions can also inquire about moving their databases to European servers.

## **HIPAA Compliance**

Ragic complies with the Health Insurance Portability and Accountability Act (HIPAA), safeguarding the process of handling, storing, and transmitting Protected Health Information (PHI).

Our hosting service providers, AWS and GCP, also adhere to these standards and can sign a Business Associate Agreement (BAA) when required.

# Storage Security

Disk Encryption, RAID storage, and Backups

- **Disk Encryption:**

All data written to disk is encrypted on the fly and then transmitted and stored in encrypted form. Conforming to ISO 27001, SSAE-16, SOC 1, SOC 2, and SOC 3 certifications.

- **RAID storage:**

All data is mirrored to multiple RAID hard disks, ensuring your data is safe from hard disk failures.

- **Server Backup:**

All servers are backed up daily to a different set of persistent storage.

- **Database Backup:**

All customer databases are backed up to a different location for disaster recovery.

# Network and System Security

Encryption, intrusion detection, and auditing logs

- **SSL Encryption:**

All data transmissions support bank level HTTPS/SSL encryption. SSL encryption is always enforced when sending sensitive information.

- **Intrusion Detection:**

Packets sent to servers go through a series of strict firewall rules and application-level intrusion detection and blocking programs to stop malicious requests and IPs in real time.

- **Complete Audit Logs:**

All requests, system events, application events, database events are logged and ready for expert analysis. Periodic review of all logs to make adjustments for new defense policies.

# Application Architecture Security

A robust application architecture is the most important line of defense for your data

- **Database security:**

Ragic's database has a unique design that does not support SQL or any other query language. There is zero chance of SQL or script injection. Different tenants' databases are stored in separate physical files, ensuring zero chance of application-level sharing exploits from other accounts.

- **Periodic Security Scan:**

We work with major service providers to perform periodic security scans for all possible weaknesses to ensure your data's safety.

- **Regular Security Updates:**

Our system administrators monitor security updates very closely and apply patches to deflect zero-day attacks.

# People processes

Nobody can access your data without your permission

- **Data Access Control:**

Nobody, including system administrators at Ragic, can access your data without your permission. When providing technical support, we can only see your database design, but not your data by default.

- **No Database Management Interface:**

Unlike most other databases, there is no interface to manage databases or play around with your data. Without such a feature, your data is safe from any unauthorized access to your data via database consoles or any management interfaces.

- **Complete Access Log:**

All data access are logged, and special events are reviewed regularly.

# Physical Server Security

World-class cloud service providers ensure the physical security of our servers

Our servers are provided by well-known public cloud providers (Google, AWS), with features including:

1. Annual audits for the following standards: ISO 27001, SOC1, SSAE16 / ISAE 3402

Type II: SOC 2, SOC 3, PCI DSS v3.0

2. Information Security Team consisting of more than 500 top experts.

3. Custom-designed electronic access cards, alarms, vehicle access barriers, perimeter fencing, metal detectors, and biometrics
